Readers are cautioned not to place undue reliance on these forward-looking statements, which speak only as of their dates, and they should not be relied upon in making purchasing decisions.

SAP CodeJam | About

- 5-6 hours **hands-on** and **networking** event in a fun and casual environment
 - Developer-community oriented
 - Led by SAP developer advocates
 - Explore products / platforms that have free developer editions available on SAP BTP
 - Not training or certificate programs, no sales presentations are included in the agenda
- For more information about the program and how to request an event, visit [SAP Community](#) pages.

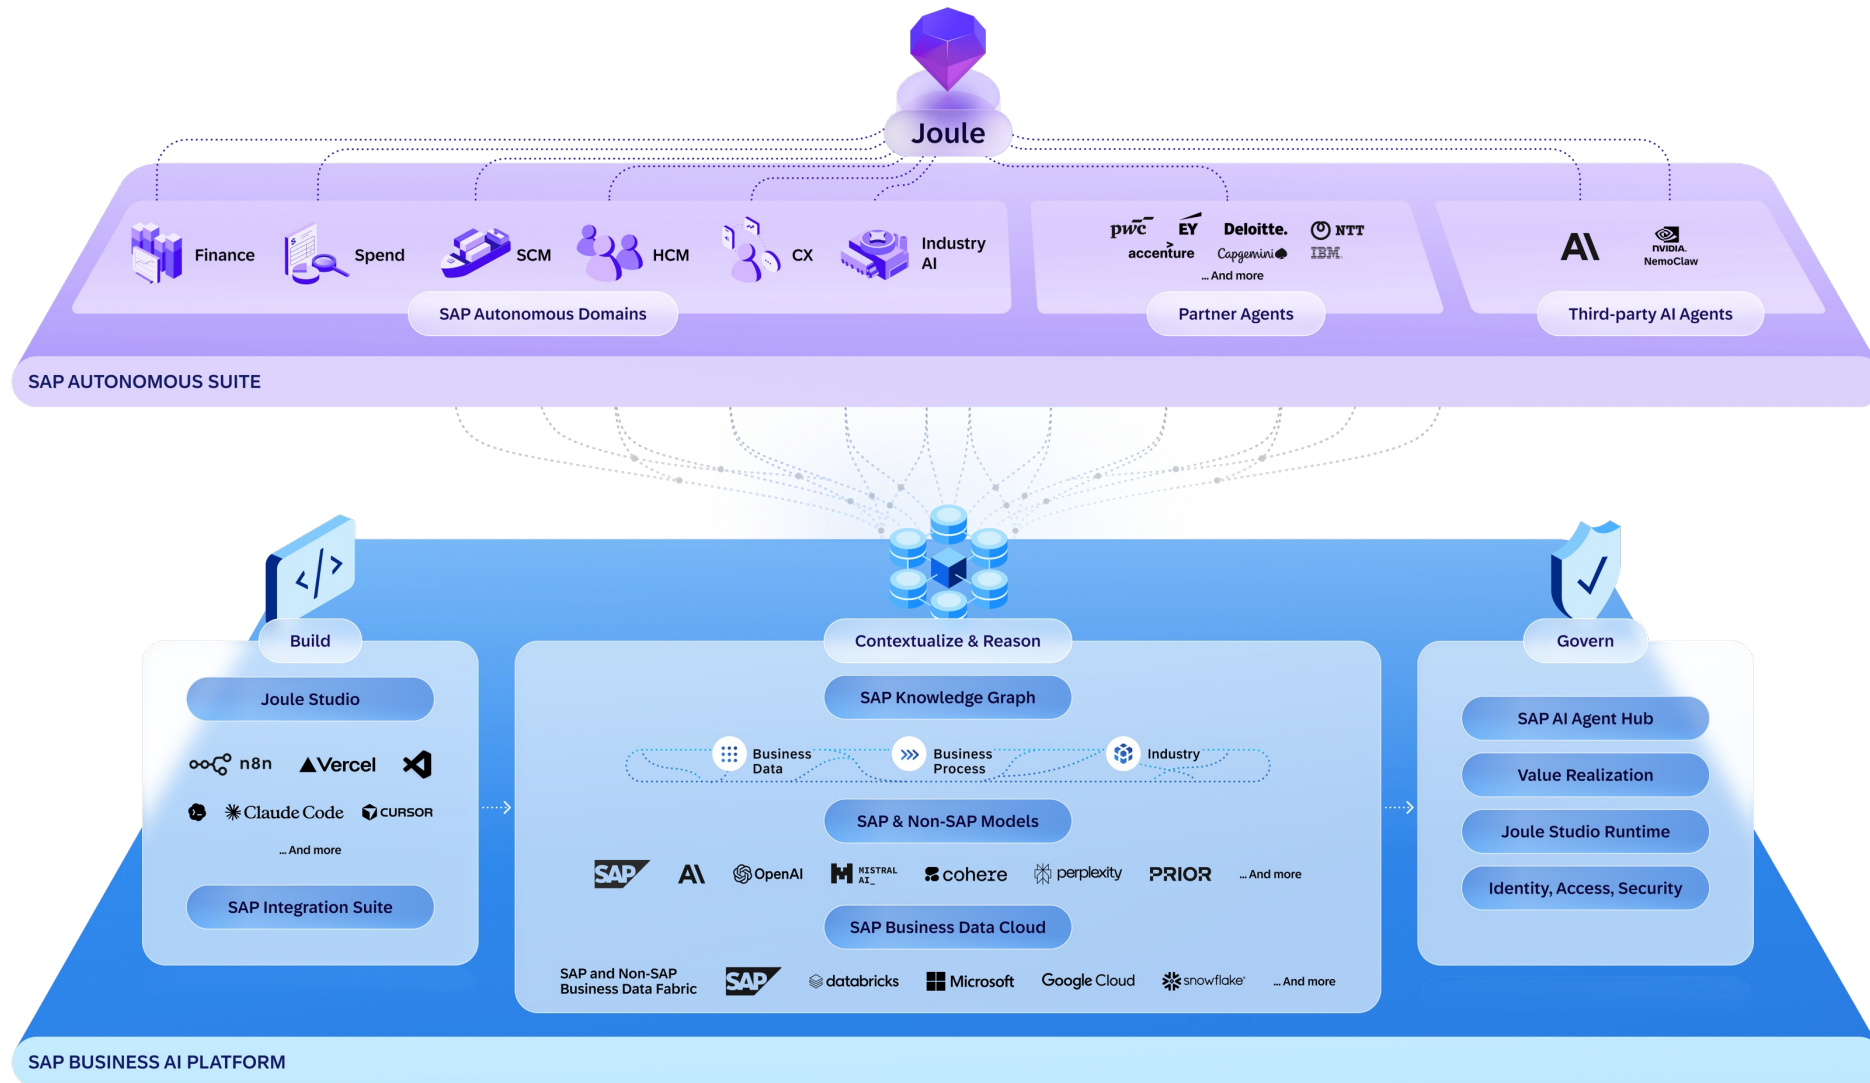

Developer Advocates @ SAP | Global team

SAP Business AI Platform

Unifies SAP BTP, SAP BDC, SAP Business AI

AI Agent

LLM

- language, knowledge, reasoning, versatility

Tools

- search engine, APIs, DB, calculator, documents, read/write files, bash, grep

Memory

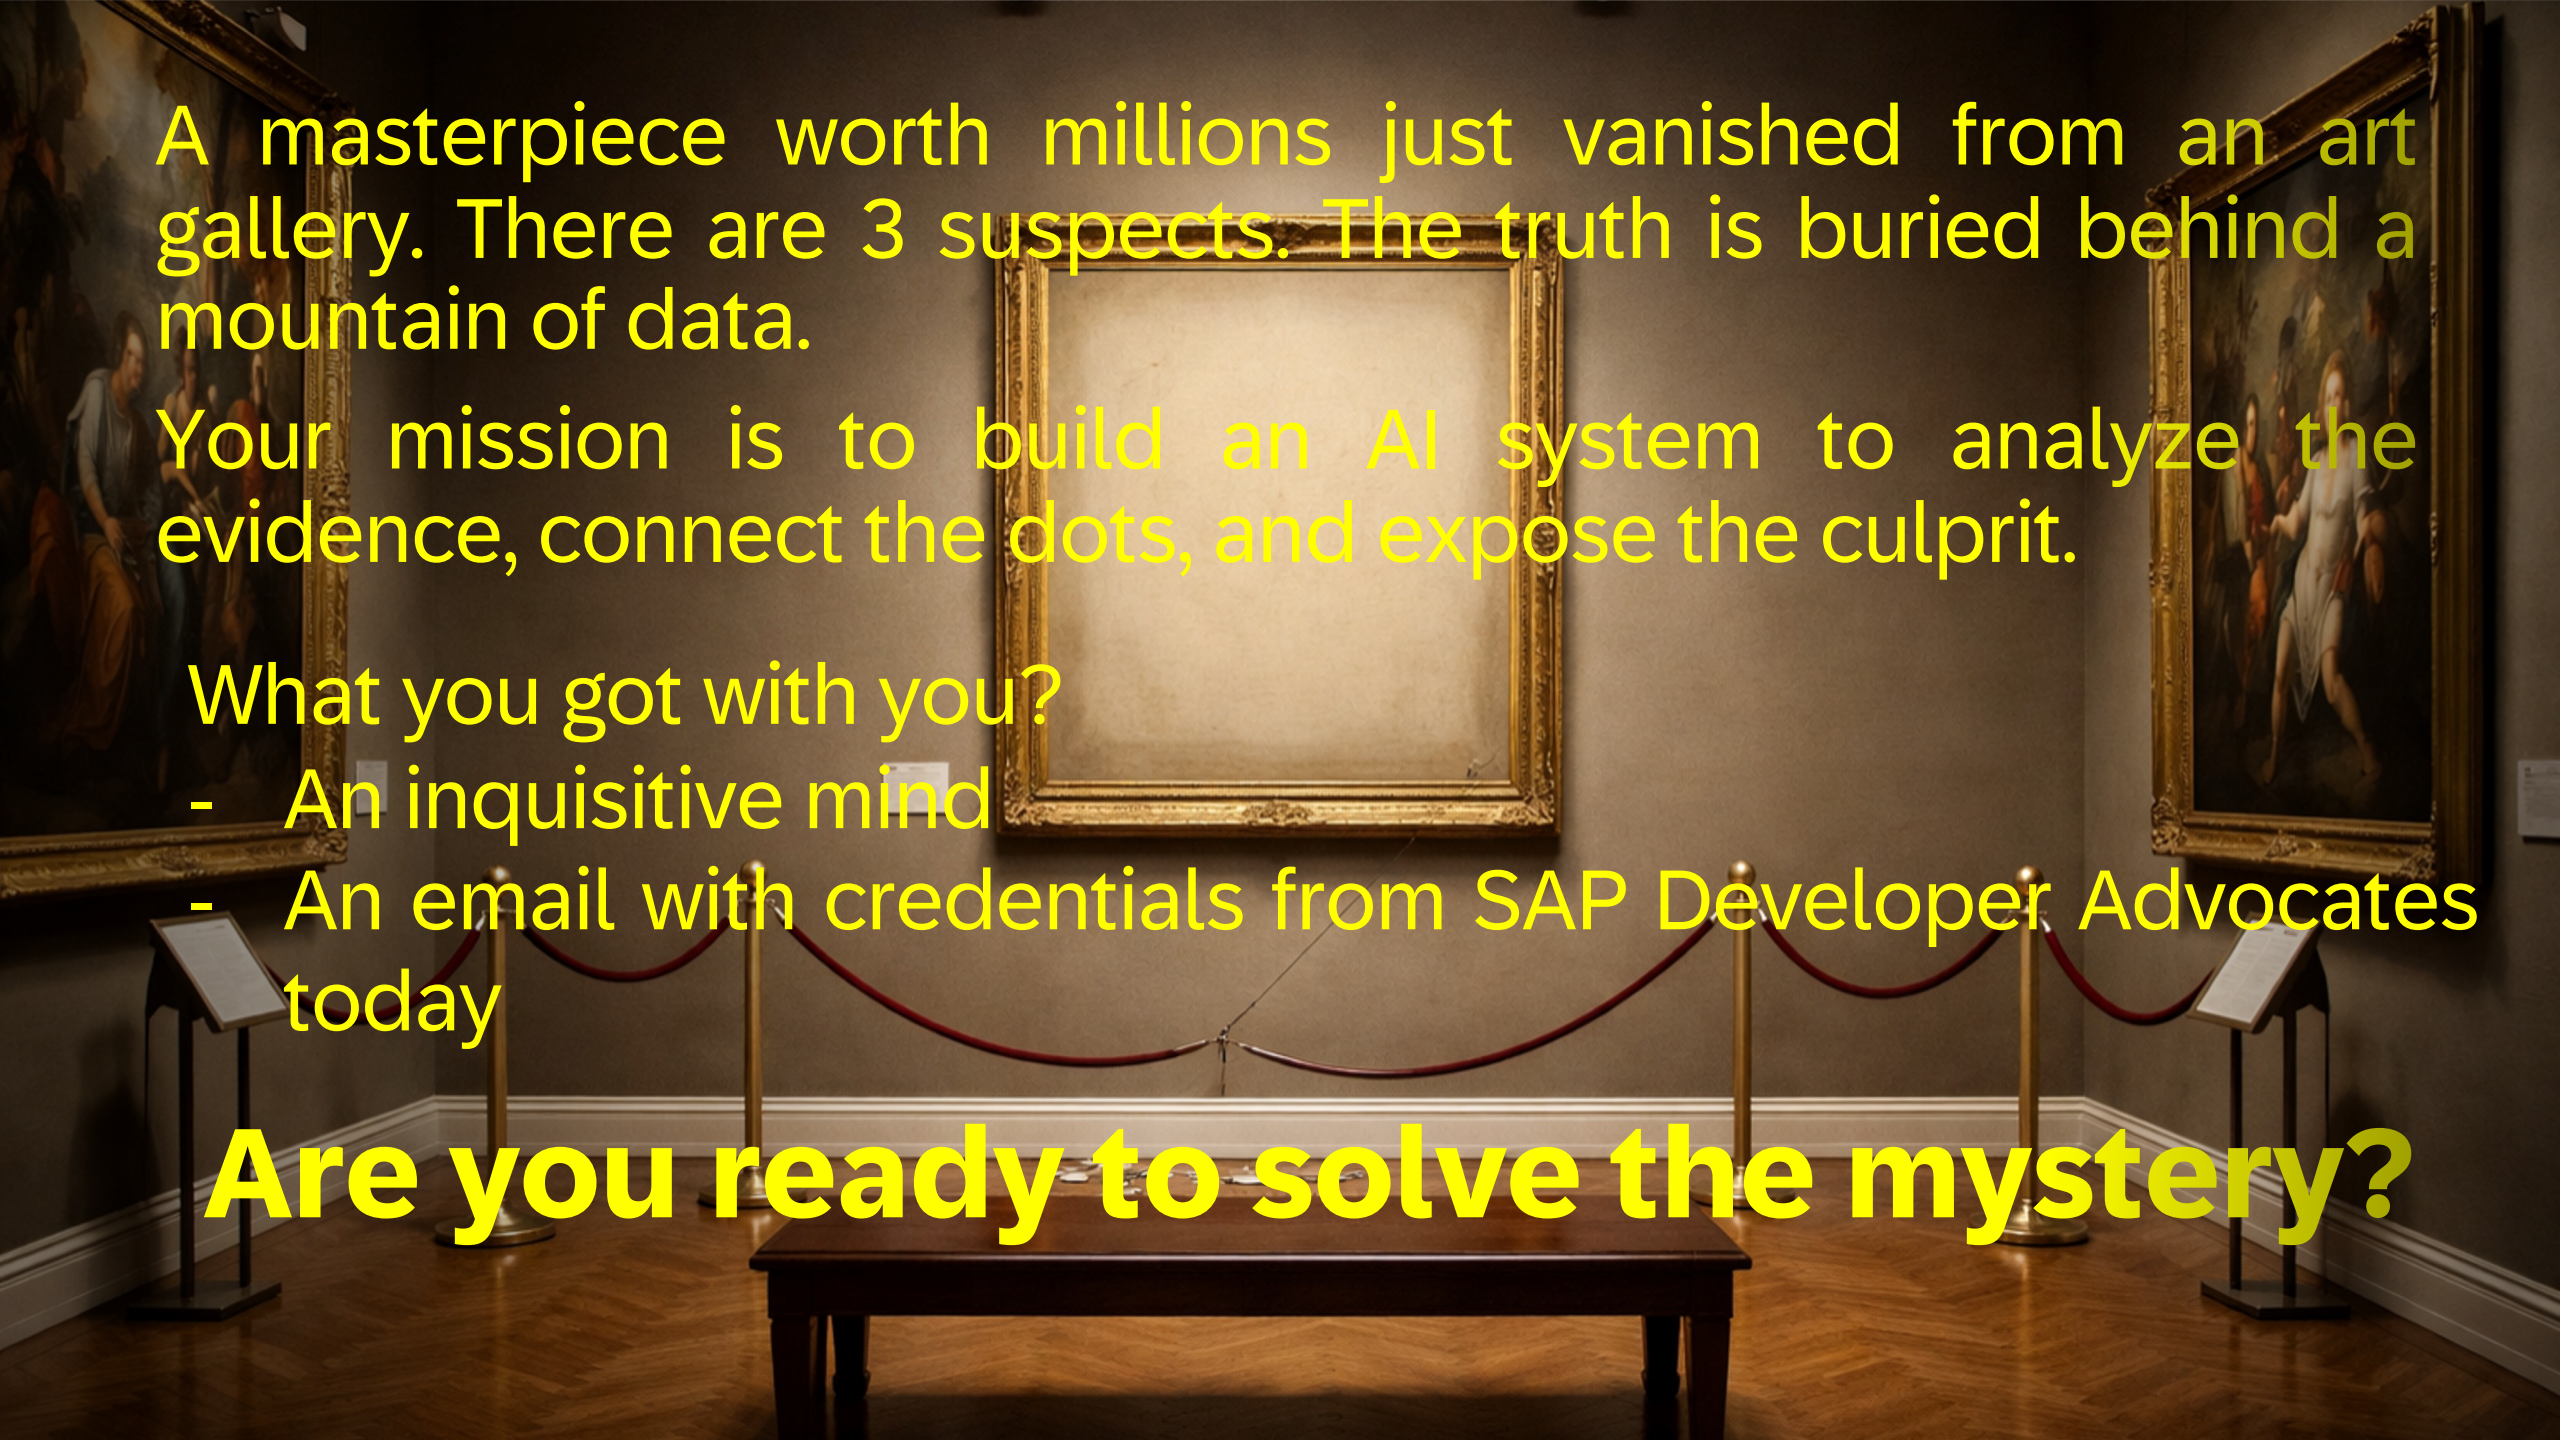

- Short-term memory (context window), Long-term memory (Postgres or HANA Agent Memory)

+++++

Agentic Loop aka Execution Loop
(hidden component)

Guardrails

- Human-in-the-Loop / HITL
- System Prompt

An art gallery with a missing masterpiece. The background shows a gallery with a wooden floor, a red velvet rope barrier, and several large paintings in ornate frames. The central painting is missing, leaving a blank space. The text is overlaid on the image in a yellow, bold font.

A masterpiece worth millions just vanished from an art gallery. There are 3 suspects. The truth is buried behind a mountain of data.

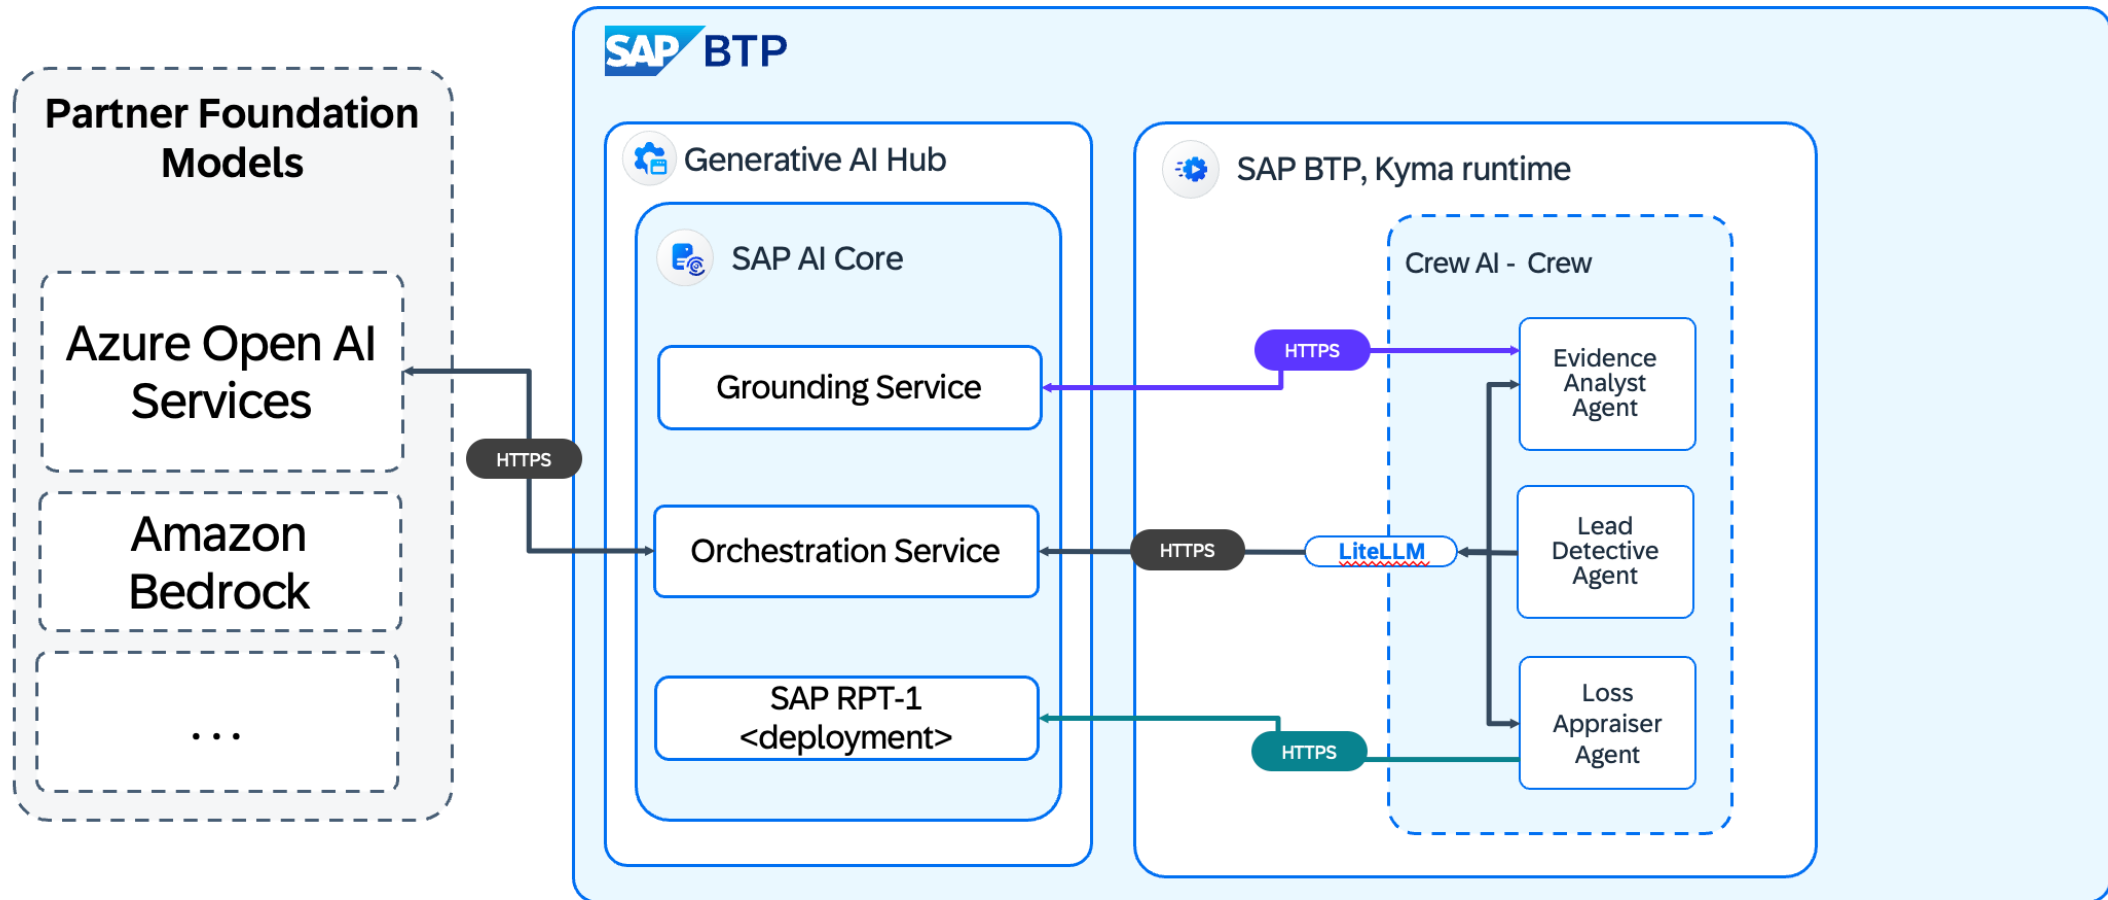

Your mission is to build an AI system to analyze the evidence, connect the dots, and expose the culprit.

What you got with you?

- An inquisitive mind
- An email with credentials from SAP Developer Advocates today

Are you ready to solve the mystery?

Code-based Agents CodeJam - Python

Tabular data processing

Predictive insights with SAP-RPT-1

Unified

Accelerate the lifecycle and democratize predictive AI capabilities from one model

Accurate

Optimize tabular processing, cross-data and context retrieval (RAG) integration, and leverage SAP data for high-accuracy predictions

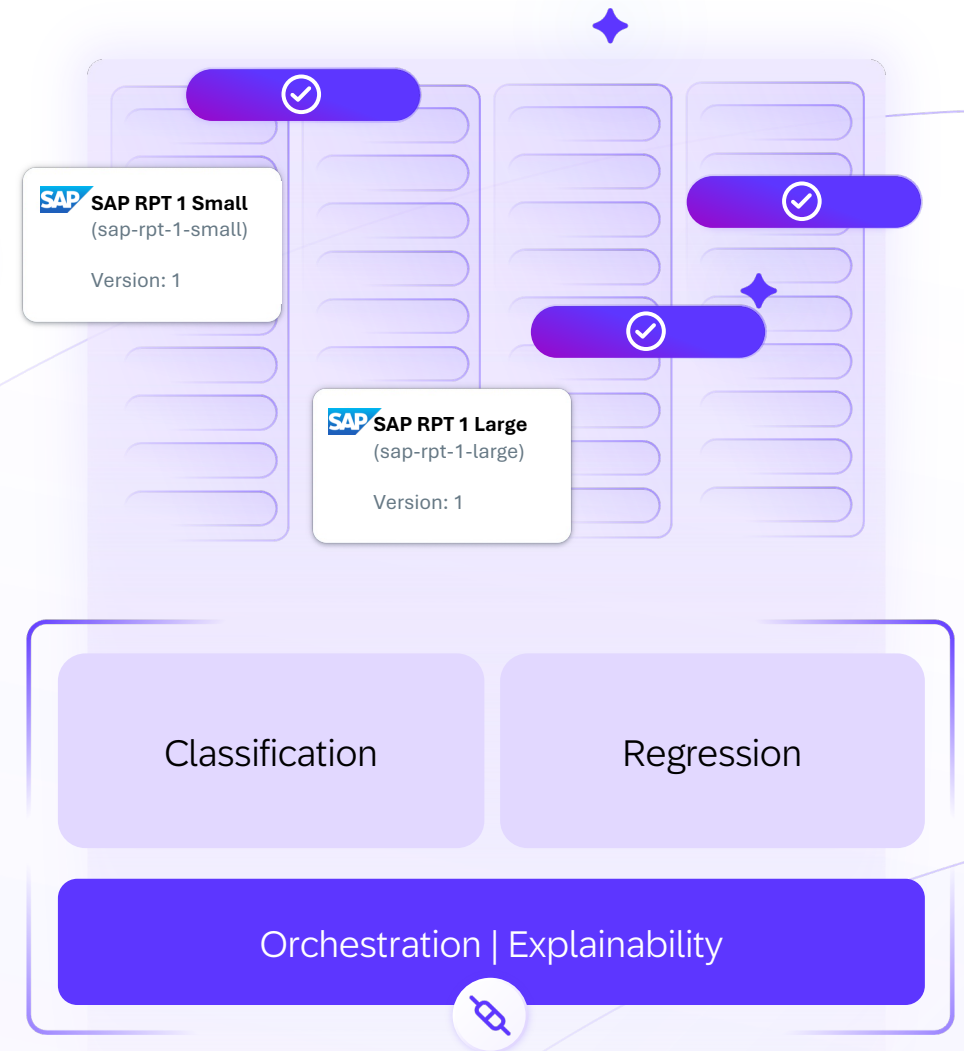

Centralized

Leverage governance that results in consistent security, compliance, and performance management

Optimal

Small and large versions that balance speed and accuracy for optimal predictive performance across use cases.

Crew AI

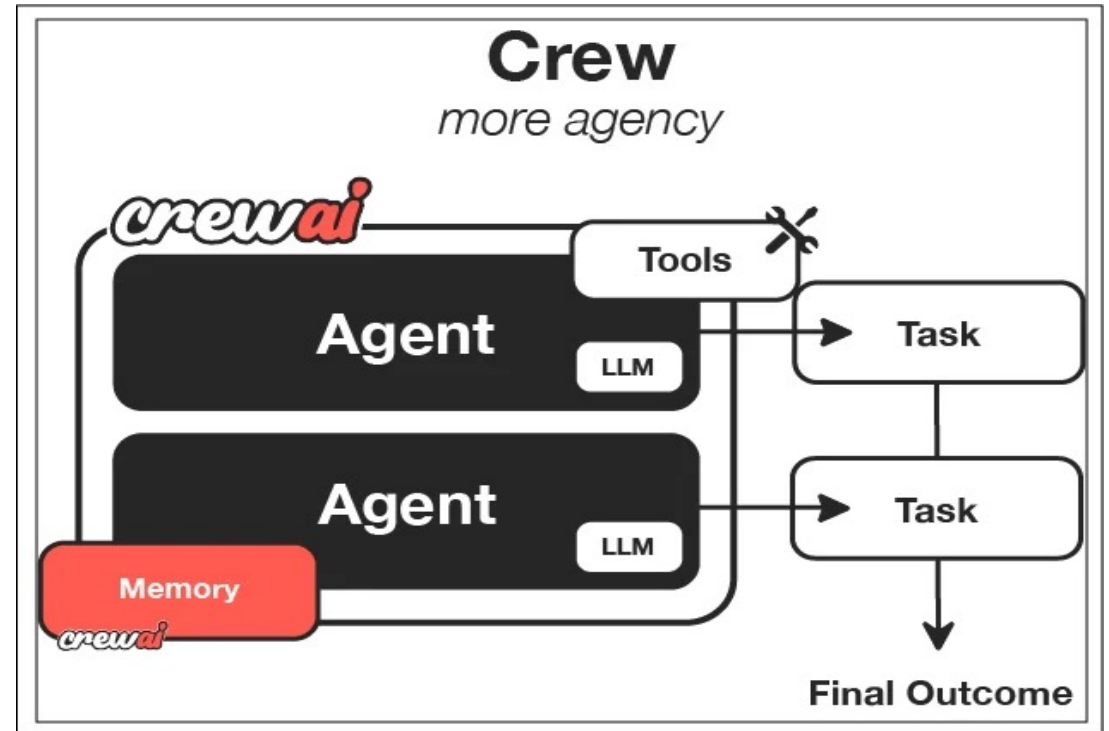

Flows provide:

State Management: Persist data across steps and executions.

Event-Driven Execution: Trigger actions based on events or external inputs.

Control Flow: Use conditional logic, loops, and branching.

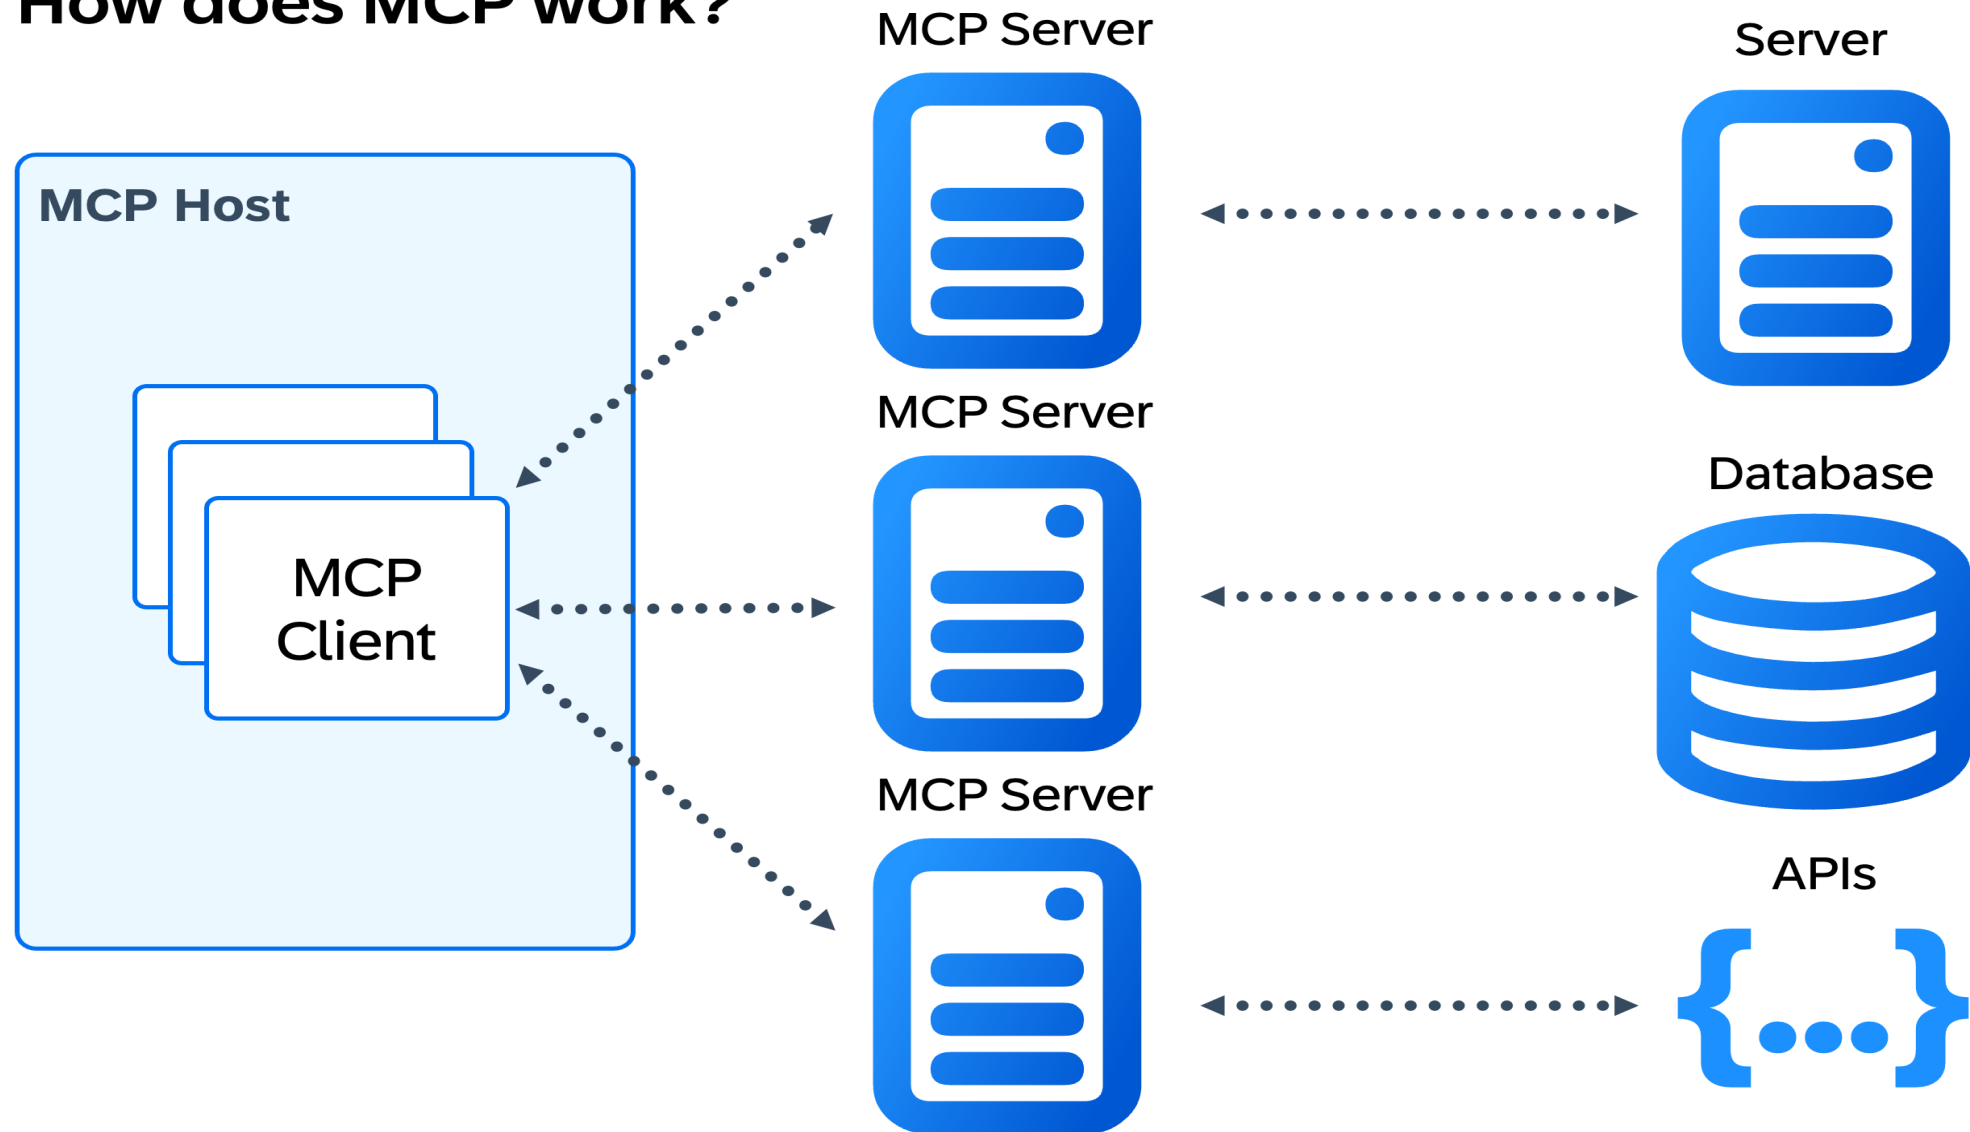

Crews provide:

Role-Playing Agents: Specialized agents with specific goals and tools.

Autonomous Collaboration: Agents work together to solve tasks.

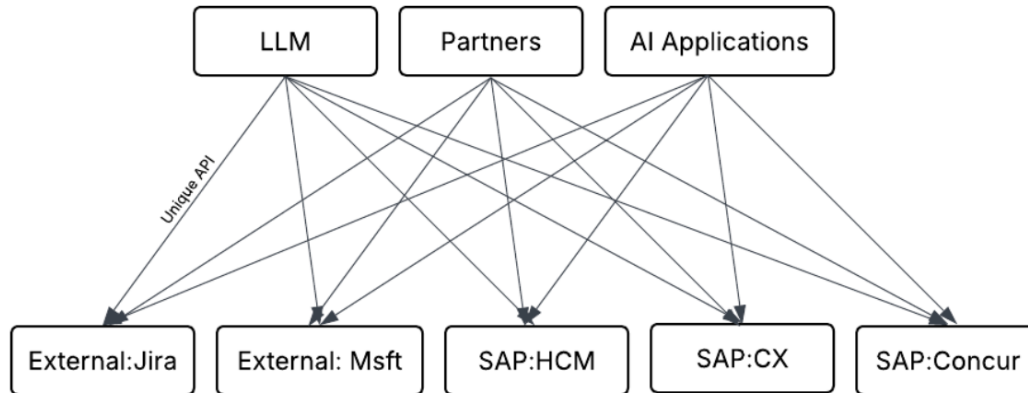

Task Delegation: Tasks are assigned and executed based on agent capabilities.

How does MCP work?

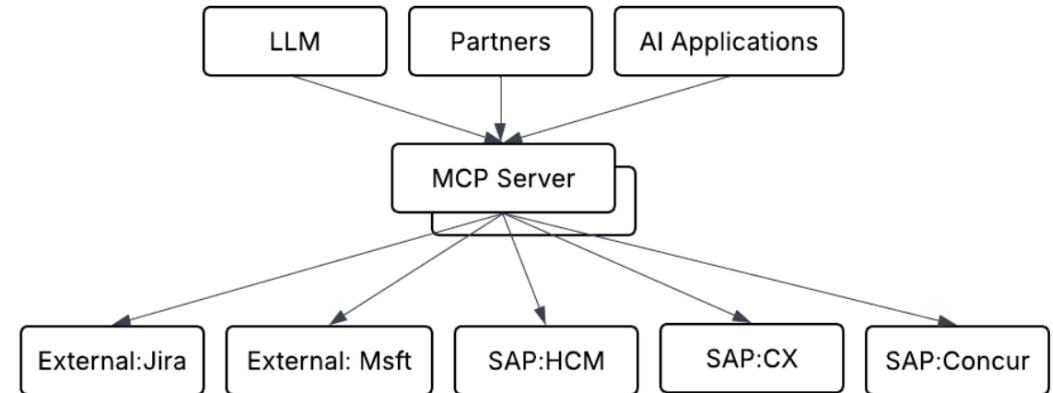

Why MCP and The problem it solves

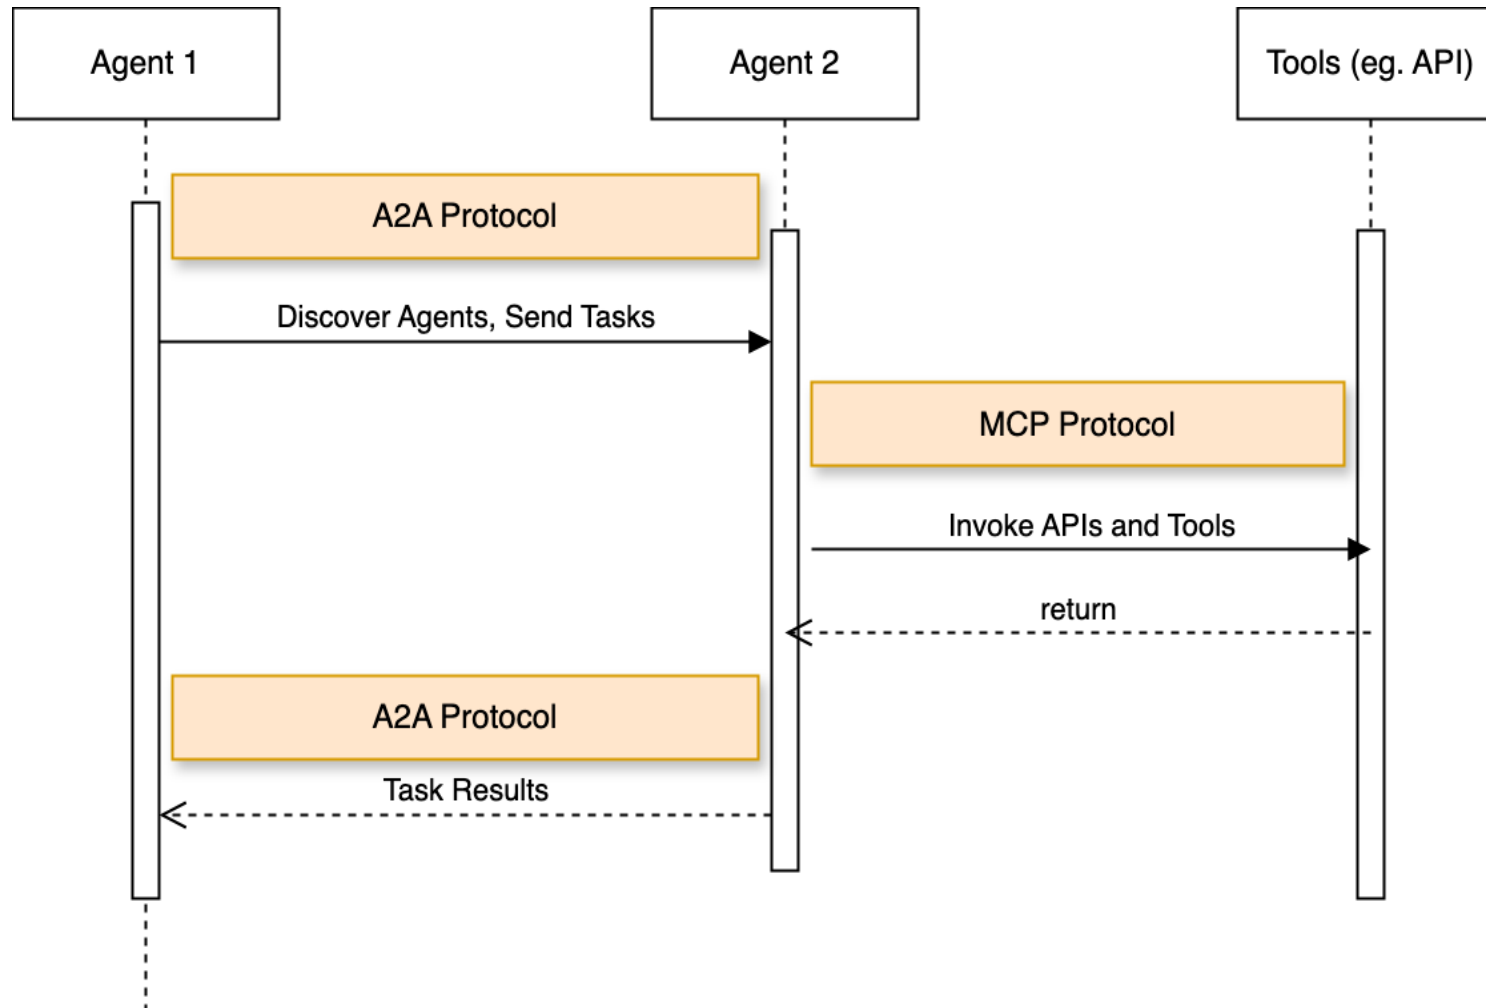

Without MCP

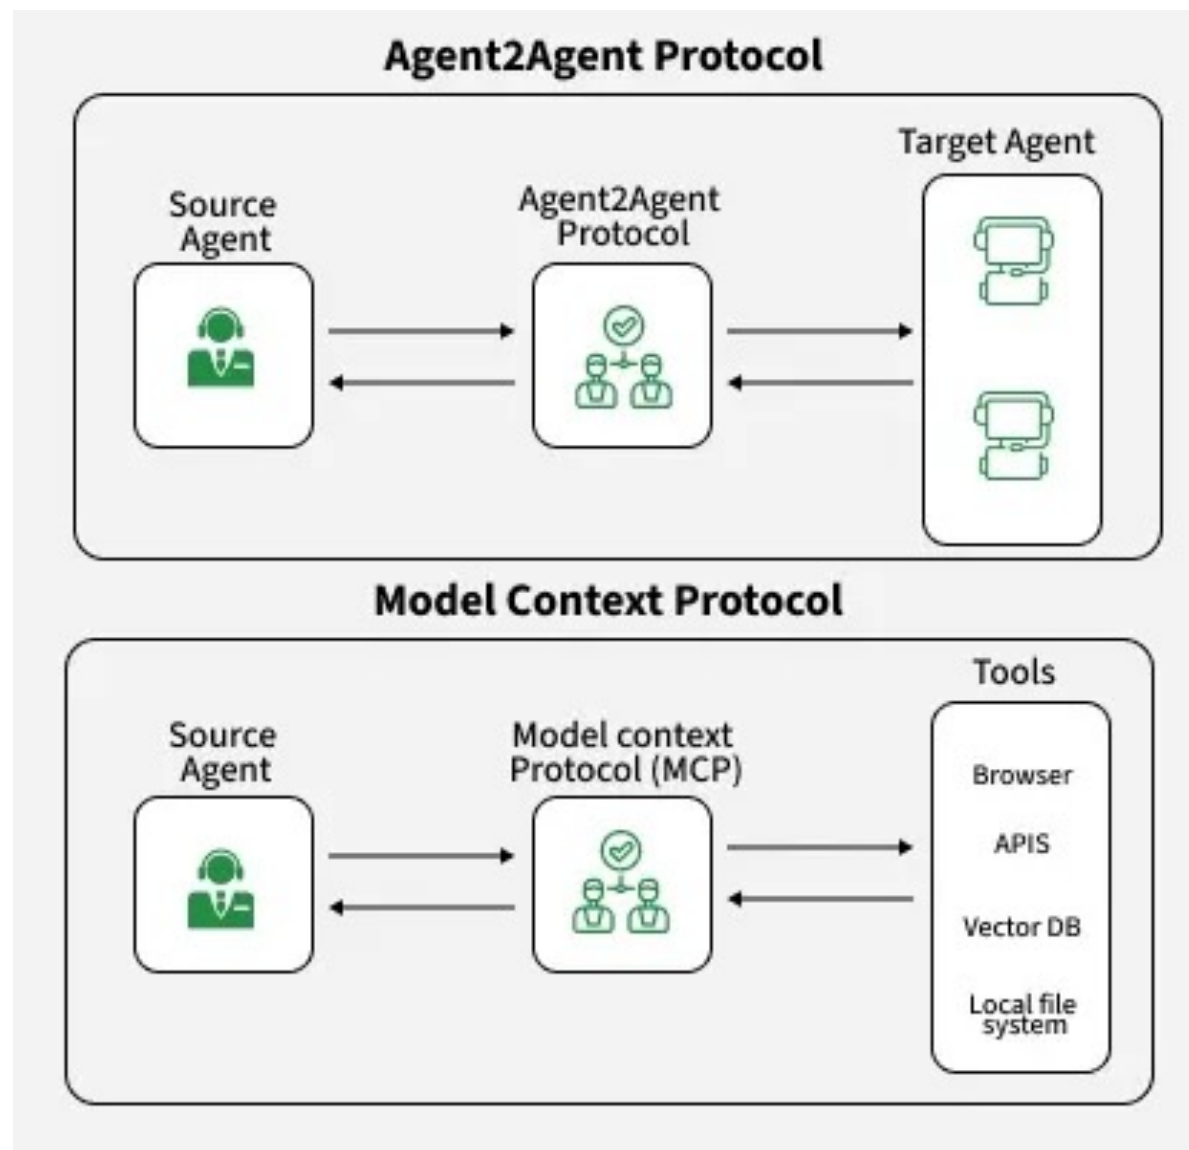

With MCP

Simplified A2A flow

A2A vs MCP

Upskilling for individuals: SAP TechEd Berlin and Virtual (October 27–29)

SAP TechEd Berlin

October 27–29, 2026

Join us in person at SAP TechEd Berlin to connect with SAP experts, join hands-on workshops, broaden your technical expertise, and expand your community.

[Register now](#)

[Learn more](#)

SAP TechEd Virtual

October 27–29, 2026

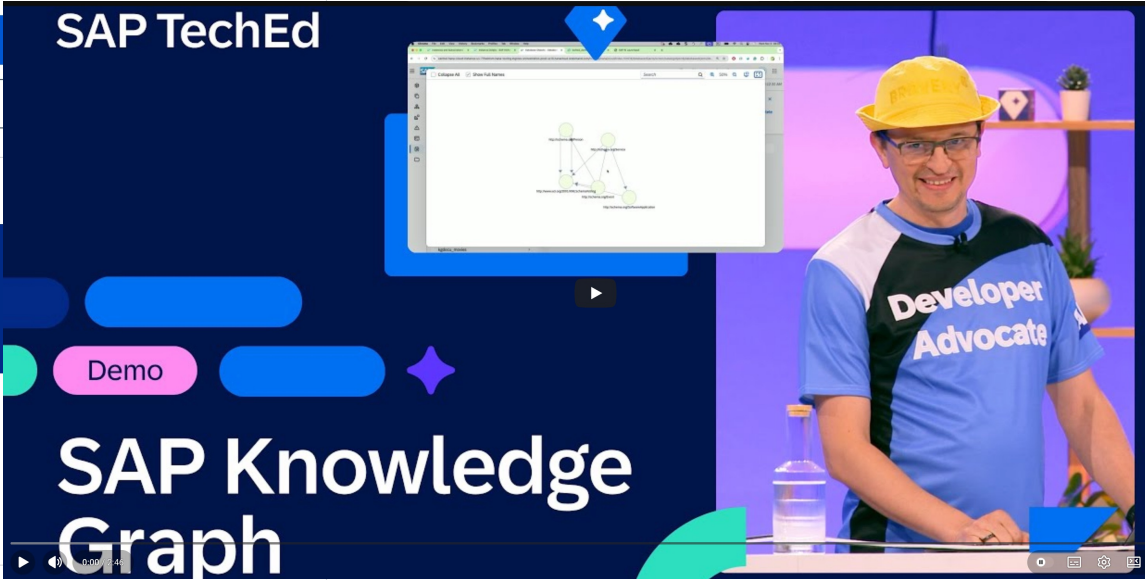

Join us online to broaden your technical expertise and explore the latest innovations in app development, integration, data, AI, and more.

[Register now](#)
